Prevent Free Radical Damage with 'Live' Whole Food Nutrition

New

CELL GUARD & PACIFIC SEA PLASMA

Cell Guard Plus™ is a combination of our well recognized 'Cell Guard' and 'Pacific Sea Plasma'. Together they provide the complete benefits of antioxidant enzymes plus the ocean's best natural live 'GREEN' food source of beta-carotene, GLA, B complex vitamins, Chlorophyll and live food enzymes.

Each Cell Guard Plus™ caplet contains a 4 to 1 blend of our famous IsoSproutPlex™ and 'Pacific Sea Plasma'.

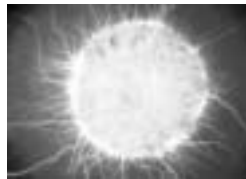

The powerful combination of these two whole 'live' foods work well together and provide the body with excellent protection against free radicals which are closely linked to many of today's serious health problems.

THE LIVING SOY SUPERFOOD

SoyGuard™ is a superior food supplement with noticeable health benefits. Soy sprouts are dehydrated at a low temperature, ground into powder and encapsulated. The result is a concentrated live Soy supplement that retains the sprouts precious phytochemicals, enzymes, vitamins and minerals.

SoyGuard™ effectively lowers your risks of disease and chronic degenerative conditions, while enhancing personal health and increasing vitality and longevity.

New

PETS NEED 'LIVE' ENZYMES TOO!

Why? Because heating and refining destroys or eliminates many of the vital properties needed in a pet's food. Whole live unprocessed foods are 'alive' with enzymes and nutrients in a form which is basic to an animal's requirements. In fact, except for the conditions caused by viruses, trauma, and parasites, virtually all pet diseases are directly linked to 'free radical' damage due to poor nutrition.

- Arthritis • Hip Dysplasia • Heart Disease • High Cholesterol • Musculo-Skeletal Decline
- Inflammation • Sore Joints • Post Trauma Recovery • Skin Disorders • Aging
- Tumors • Food Allergies • Immune System Deficiency • Toxic Poisoning

The BioVet Pet Antioxidant Wafer provides potent antioxidant enzymes, pro-vitamins, and other base nutritional precursors for a pet's good health and longevity. Many pets show signs of recovery in as short as 4 to 8 days.

PREVENT FREE RADICAL DAMAGE WITH 'LIVE' WHOLE FOOD NUTRITION

REPAIR YOUR BODY

Cell Guard

Low energy, soreness of joints, inflammation, chronic fatigue, disease and lack of vitality have a common link called 'Free Radicals'. Like all matter, our bodies are composed of molecules. Each molecule is made up of atoms, with a nucleus and electrons. Ordinarily, the molecule's electrons occur in balanced pairs keeping the molecule stable.

When a molecule loses one of its electrons or gains an extra one, this causes the molecule to become unstable and highly reactive. Such a molecule is called a 'Free Radical'. Naturally, a free radical will try to return to stability by stealing an electron from another molecule to restore its balance. This act of thievery causes 'Cellular Damage'. Having unpaired electrons is not a favorable state for a molecule. The end result is that the healthy cells are damaged and the body's proper functioning is impaired.

Nature equips the body to produce special enzymes called 'Antioxidants' which catalyze the removal of the 'Free Radicals' before they can cause serious cellular damage. The body's production of these enzymes drops off around the age of 25 and is directly linked to proper nutrition. Unfortunately, today's food supply is so over-processed and nutritionally void that it fails to provide our bodies with the natural precursor elements needed for adequate antioxidant enzyme protection. Today, the increased stresses of modern life combined with age and the nutritional inadequacies of a contemporary diet result in an excess of free radical activity in the body and a deficiency in the available supply of antioxidants to remove them.

In order for the body to function optimally, we each need phytonutrients rich in isoflavones. By increasing our daily intake of these key nutrients, our natural vitality is restored. **Cell Guard™** is recommended in the 'Prescription for Nutritional Healing' as the most powerful source of 'Anti Free Radical' enzyme precursors available.

CONTROL AGING

Ageless Beauty

Cellular skin damage caused by free radicals invites wrinkles, age spots and other skin disorders. Unfortunately today, many factors combine to overwhelm the body's cells with excess amounts of free radicals. Pollution, cigarettes, excess sun, over-exertion and poor basic nutrition all create an unhealthy cell environment. Diets rich in antioxidant enzymes contained in whole 'Live' foods or supplements like **Ageless Beauty™** help maintain a balanced cellular environment and promote the return to a vibrant and healthy appearance.

MANAGE YOUR STRESS

Anti-Stress Enzymes • Jet Stress

Stress promotes the formation of 'Free Radicals' that damage the body's tissues, especially cell membranes. Researchers estimate that stress contributes to as much as 80% of all major illnesses. It 'opens the door' for infection and further depletes vital reserves weakening the immune response capability. Thus 'Stress' creates an excellent breeding ground for illness. Your health depends on a delicate balance of cellular activities and oxygen metabolism. **Anti-Stress Enzymes™** is specially formulated to provide the most effective nutritional supplement to counter the effects of daily stresses.

In a recent survey of 784 jet travelers, a whopping 94% reported suffering from the stress of jet lag. Symptoms were fatigue, sleep disturbance, slowed reflexes, irritability, and upset digestion. Current research has found that these disturbances are the result of environmental hazards as well as 'biological clock' disturbances. **Jet Stress™** is the perfect solution.

PROTECTION FOR EXERCISING

ExtraEnergyEnzymes • ExerciseEdge • Runner's Edge

'Hydroxyl Free Radicals' are created when we burn the fat molecules to produce energy as needed by the body in strenuous exercise. This is due to the lack of evacuation of chemicals and toxins stored in the fatty tissue which are released when these tissues are used for fuel. These toxins, when not properly evacuated from the body, generate the formation of the most dangerous of all, 'Hydroxyl Free Radical' which has the ability to damage any type of organic cellular tissue.

While most avid exercisers are aware of the need to obtain extra nutrition to fuel their exercising activities, many miss the importance of the need to clean out the extra metabolic wastes that are the direct results of their daily exercise routines.

People using **Extra Energy Enzymes™** report having increased energy and vitality as well as greater overall endurance. People using **Exercise Edge™** have reported greater endurance, stamina, flexibility, and the ability to recover quickly from extensive exercise. **Runner's Edge™** was developed to protect the body's cell membranes during daily exercising activities like running or jogging.

CLEANSE THE BODY

Bio-Gestin • FiberZyme

Researchers studying societies throughout the world, have observed that in those societies which have maintained traditional diets consisting primarily of high fiber grains, tubers and vegetables, that constipation and other digestive ills are practically unheard of. Today's low fiber, processed foods have damaged the efficacy of a system that has evolved through hundreds of millions of years. Scientifically, we now understand that the proper amounts of fiber plus moisture are key ingredients in maintaining normal regularity.

Bio-Gestin™ uses the unique property of green papaya to support the working of the human digestive system. It is made entirely from Papaya Pacifica. Inside the body, the two enzymes work as a team with papain beginning the process of protein digestion and chymopapain completing it. Taken shortly before or with meals, **Bio-Gestin™** effectively breaks down the proteins in the foods we eat and releases their full nutritional content in a form usable by the human body.

FiberZyme™ delivers the proper amounts of the right type of fiber each day. Containing a balance of 20% soluble and 80% insoluble fiber in a nutritious whole food form.

INCREASE YOUR ENERGY
