CELL GUARD™ is made entirely of specially developed, hydroponically grown *IsoSproutPlex*ô. Each caplet contains concentrated plant enzymes and isoflavanoids. Our specialized moisture removal process preserves probiotic nutritional factors. This unique complex has been shown to enhance the body's production of erythrocyte superoxide dismutase (eSOD), and it related catalase (CAT), methionine reductase (MET) and a selenioorganic compound that mimics glutathione peroxidase endogenously (GPx). Directions: First 2 weeks: Take 5 caplets per day upon arising with water on an empty stomach at least 30 minutes before eating. Thereafter, 3 caplets per day or as directed by your health care practitioner. Water is important, be sure to drink 8 glasses of pure water daily.
